$ startxwin -h
Andrei Paraoan@Cliofoiofe1 ~
$ Welcome to the Win_X Server
Vendor: The Cugnun_X Project
Release: 6.8-2.8
Contact: cugnun-xfree@cugnun.com

XWin was started with the following command line:

XWin -multiwindow clipboard -silent -dop-error

[XSERVTrans]dir: Cannot create '/tmp/X11-unix/X11-ConsecutiveScreens': 1
winInitClipboard - g_16bitScreens : 1 MaxConsecutiveScreens=1
winInitClipboard is not supported
(11) See http://www.x.org/doc/xf86config-XFree86.html for more information
(==) FontPath set to: /usr/X11R6/lib/X11/fonts/75dpi/usw/X11/fonts/75dpi/usw/X11/fonts/TT
    /usr/X11R6/lib/X11/fonts/75dpi/usw/X11/fonts/75dpi/usw/X11/fonts/CD/; /usr/X11R6/lib/
    X11/fonts/75dpi/usw/X11/fonts/Times/75dpi/usw/X11/fonts/75dpi/usw/X11/fonts/CD/
Windows NT 2000/XP
Windows NT 2000/XP
DirectDraw installed
DirectDraw4 installed
ReturnEngine supported engines
MultiWindow or Rootless => ShadowGD
windiInitShadowModeShadowGD - Using Windows display with width: 1400 height: 1050 depth: 32
Masks: 00FF0000 0000FF00 000000FF Masks: 00FF00 0000FF 0000000F BPRGB 8 d 24 bpp 32
run it with the
intention is to
and startx should
some help with
In-Queue - Calling pthread_mutex_init()
pthread mutex-in it returned
In-Queue - Calling pthread_cond_init()
pthread mutex-in it returned
winInitMultiwindowMM - Hello
winInitMultiwindowMM - Calling pthread_mutex_lock()
winMultiWindowMMgProc - Hello
winMultiWindowMMgProc - Calling pthread_mutex_lock()
MIT-SHM extension disabled due to lack of kernel support
XFree86-Bigfont extension local-level optimization disabled due to lack of shared memory support in the kernel
(<->) Setting autorepeat to delay=500, rate=31
(<->) winConfigKeyboard - Layout: "00000409" <00000409>, type "4"
